qualified electrician

Compatible
with **Oral-B/
Braun Electric
Toothbrushes***

Hassle-free, wire-free toothbrush charging

An electric toothbrush is a great way to maintain oral hygiene, but charging it can be a hassle.

Many people struggle to find a suitable spot to charge their toothbrush due to the standard short wire, and there's also a risk of the toothbrush toppling over. Fortunately, the TBCharge by ProofVision has revolutionised the dental routine for thousands of customers, providing an always-charged toothbrush that's ready to use.

ProofVision's TBCharge comes in three models. A single charger is ideal for individuals, while the model with a shaver socket is a convenient option for those who use electric shavers. Families can benefit from the dual charger, which can charge two toothbrushes at once. Additionally, the chargers' appearance can be customised with polished, brushed, and matt black faceplates to complement any bathroom decor.

In-wall electric toothbrush charger

Our original in-wall charger for hassle free, wire-free toothbrush charging. Available in white plastic as standard with 3 optional faceplate finishes to match your bathroom.
